

### UPDATES TO ZIKA VIRUS TESTING

**Effective Date: March 20, 2018**

As of March 20, 2018, the Michigan Department of Health and Human Services Laboratory will no longer offer screening services for Zika virus testing due to budget constraints. As a result, Beaumont Laboratory will send Zika virus testing to ARUP Laboratories instead. We will continue to follow the recommendations from CDC for testing. These recommendations with details and indications for testing are available online in the Laboratory Test Directory. Specimen collection, processing, and ordering will remain unchanged until further notice.

The Michigan Zika Supplemental Questionnaire will still need to be completed and returned with the specimen.

As this is a miscellaneous procedure, an order for the Sendout Laboratory will be necessary.

If you have questions, please contact Client Services (1-800-551-0488, option 5).
