

Beaumont

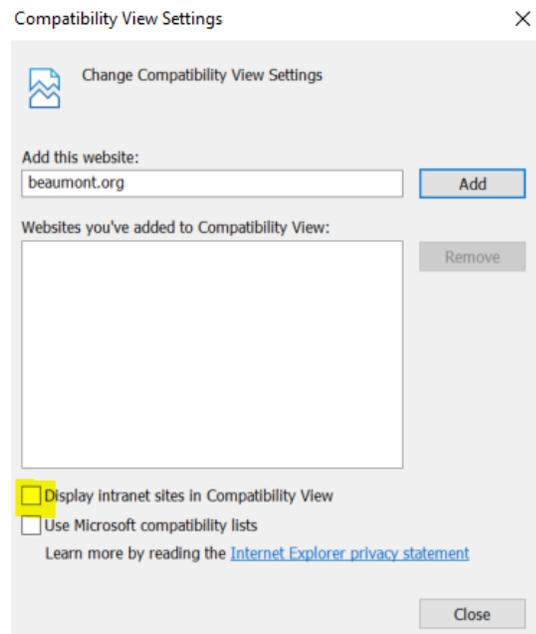

Atlas works best using Internet Explorer

Link to Atlas: <https://beaumont.elaborders.com>

Atlas requires a few adjustments to the browser settings:

Disable compatibility mode:

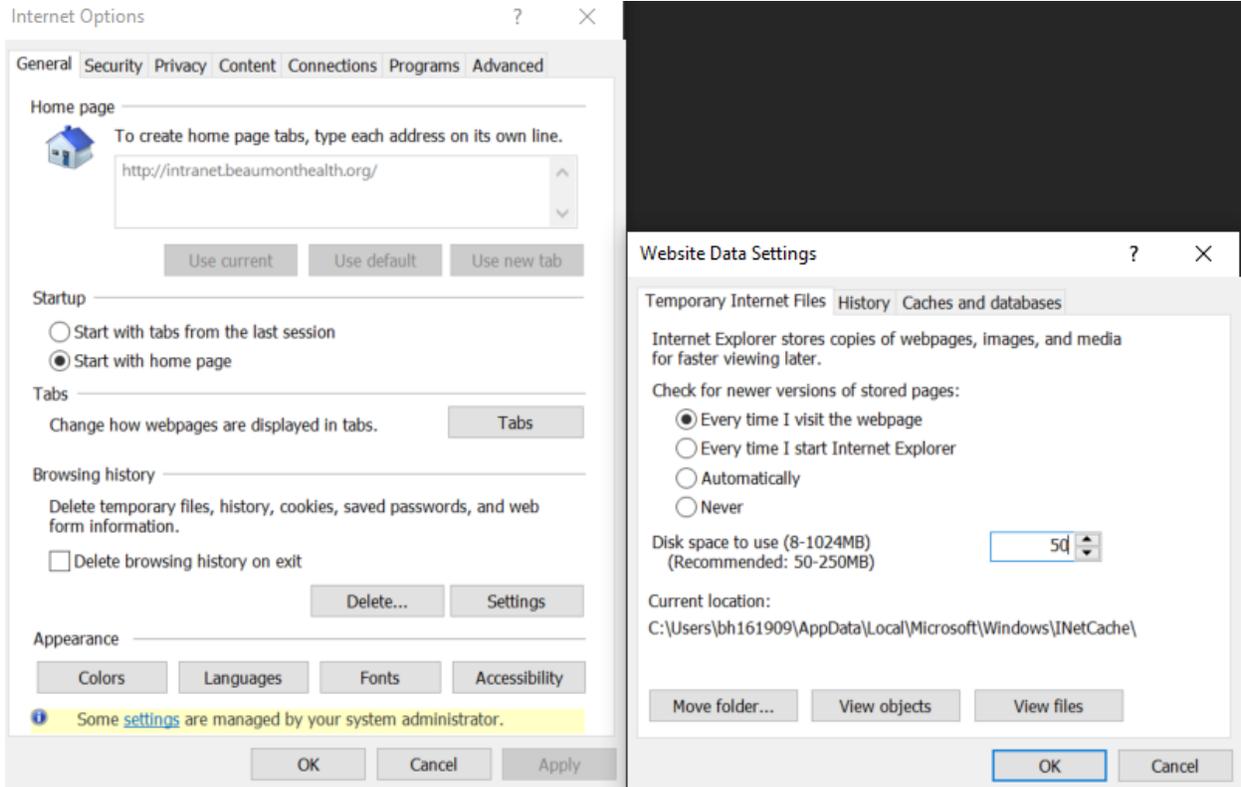

Open IE > Select Tools > Compatibility View Settings > Ensure that “Display all websites in Compatibility View” is **NOT** checked.

Checking for newer versions of stored pages:

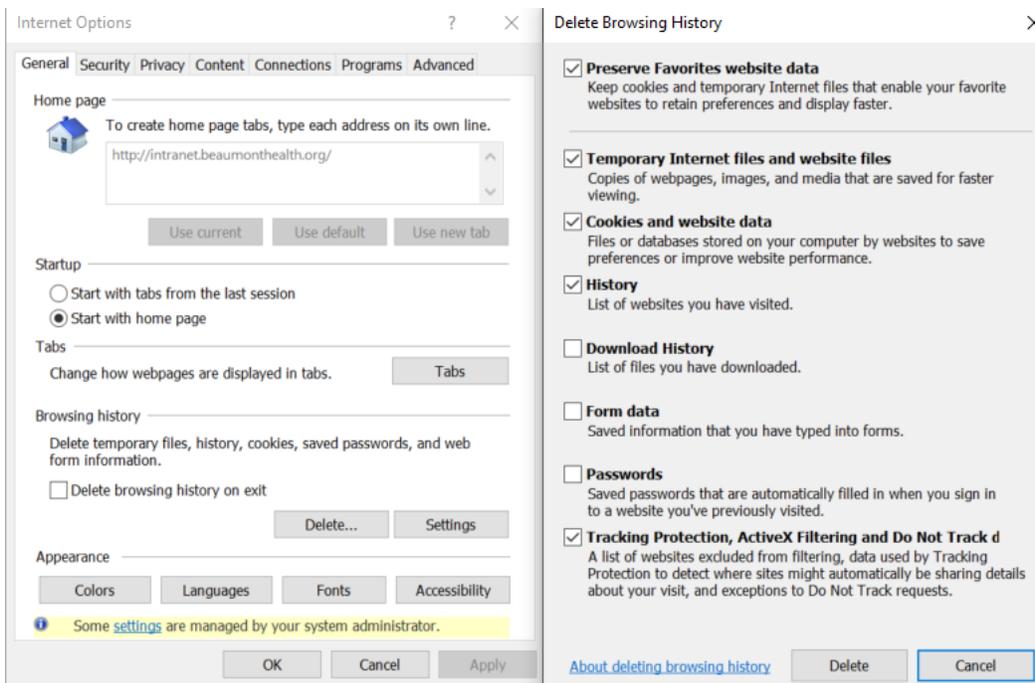

Internet Options > General Tab > Settings > Check radio button “Every time I visit the webpage” > Change disk space to use to 50MB

Beaumont

Deleting Temporary Internet Data:

Internet Options > General Tab > Delete... > check 'Temporary Internet Files and Website Files' & 'Tracking Protection, ActiveX Filtering, and Do Not Track Data' > Click Delete

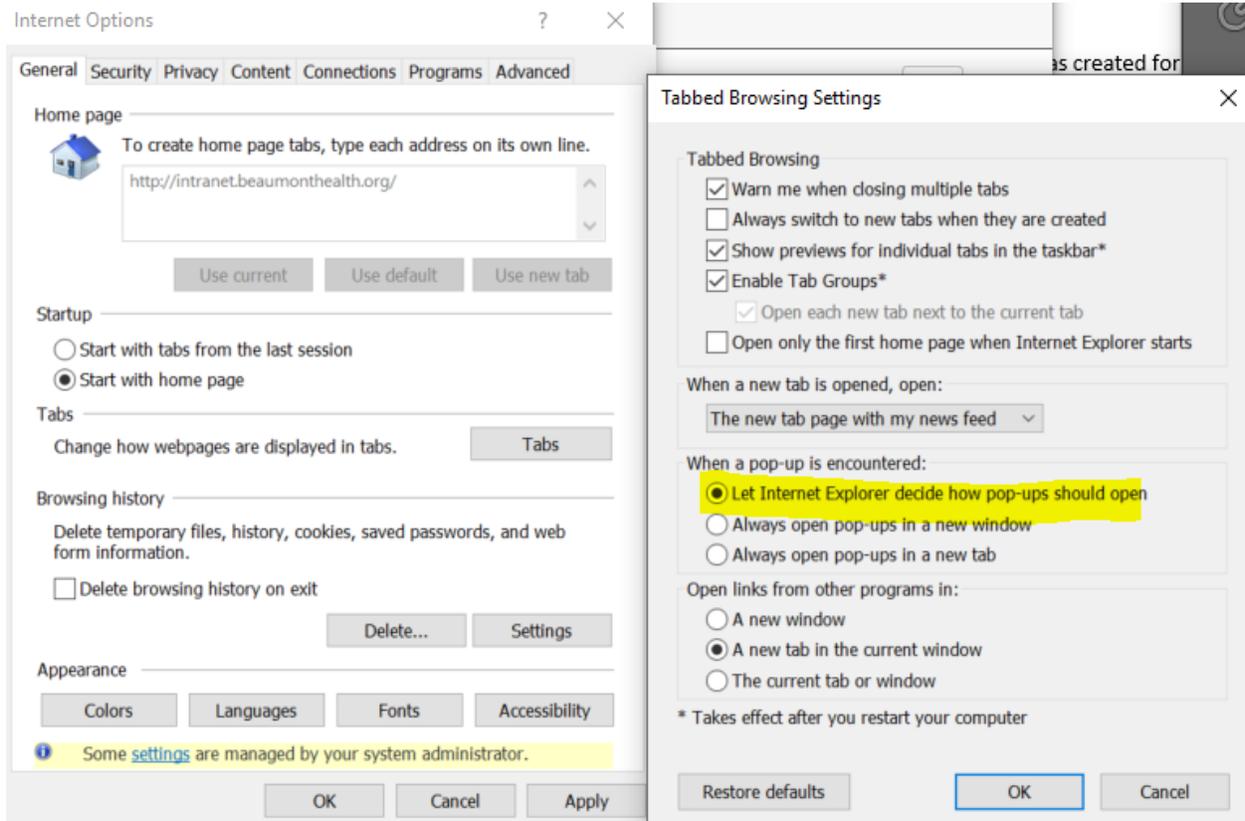

Beaumont

Disable Pop-Up Blocker:

Internet Options > Privacy tab > Uncheck 'turn on Pop-up Blocker'

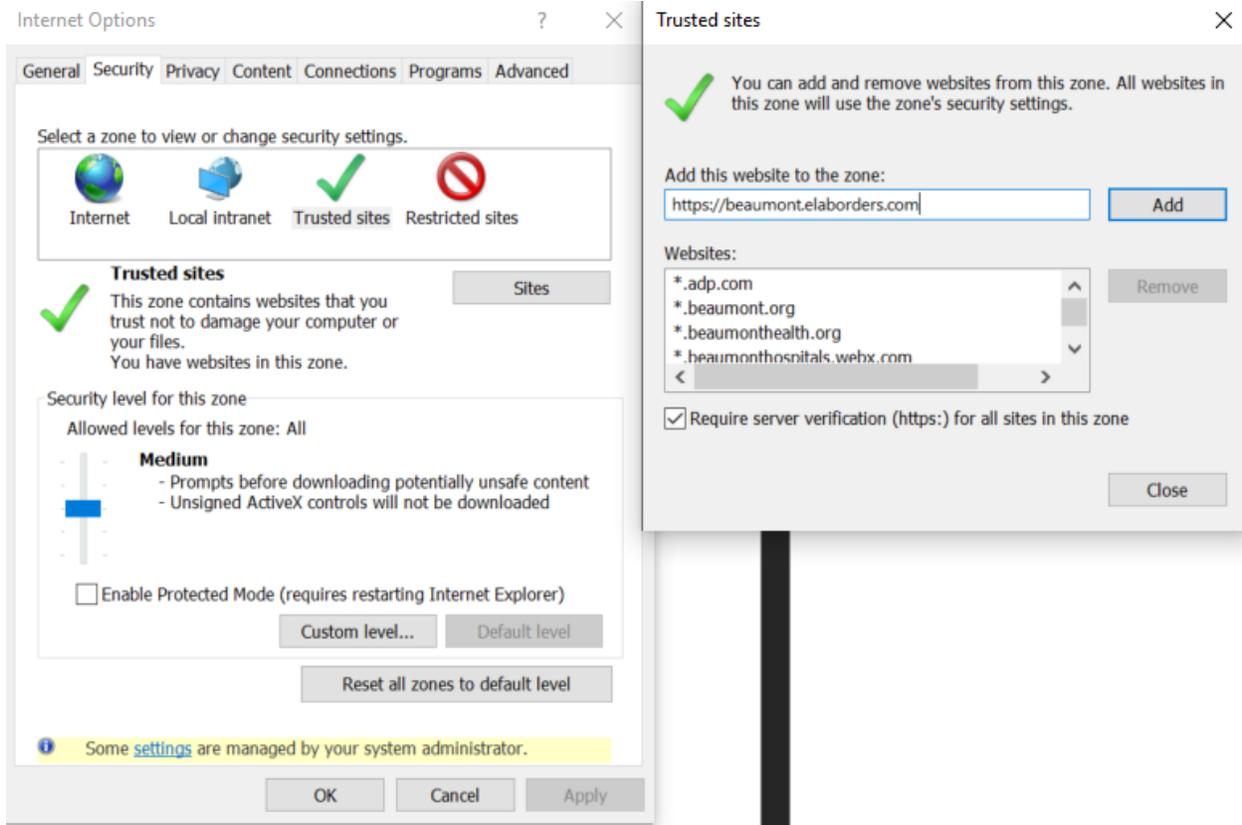

Internet Options > Tabs > click radio button 'Let Internet Explorer decide how pop-ups should open'

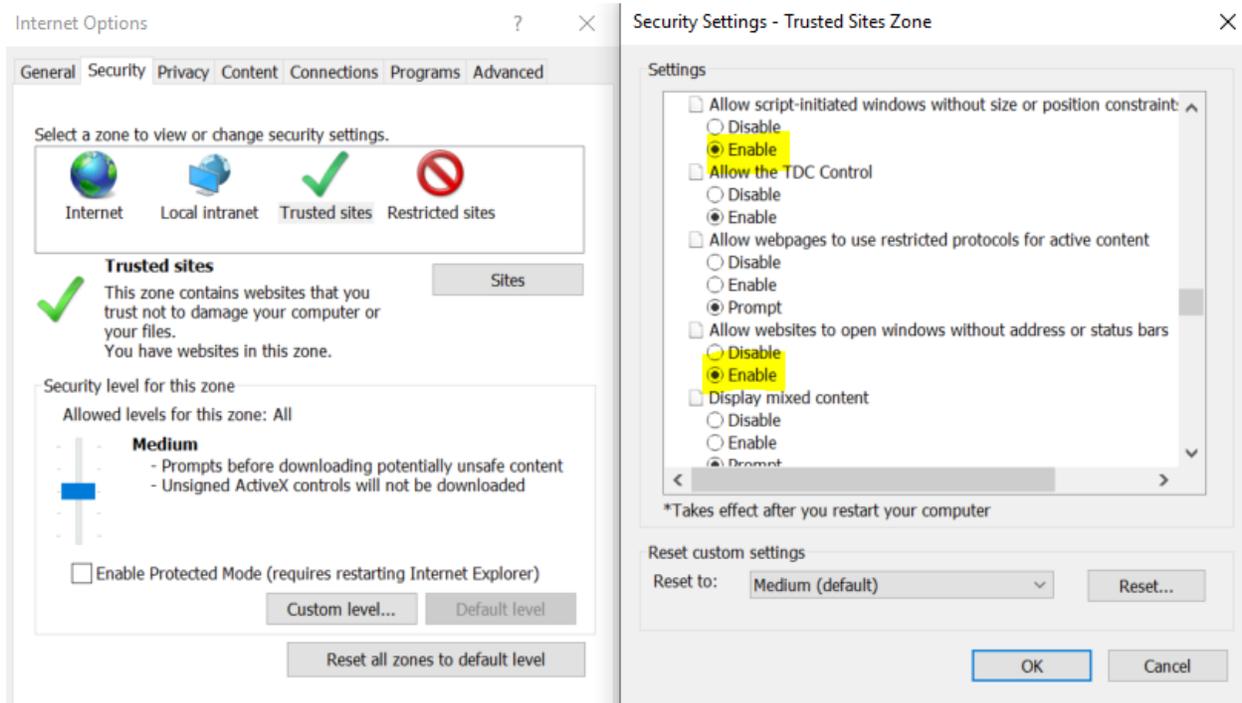

Adding the physician portal as a trusted site:

Internet Options > Security tab > Trusted sites > Sites > add <https://beaumont.elaborders.com> to the trusted sites

Beaumont

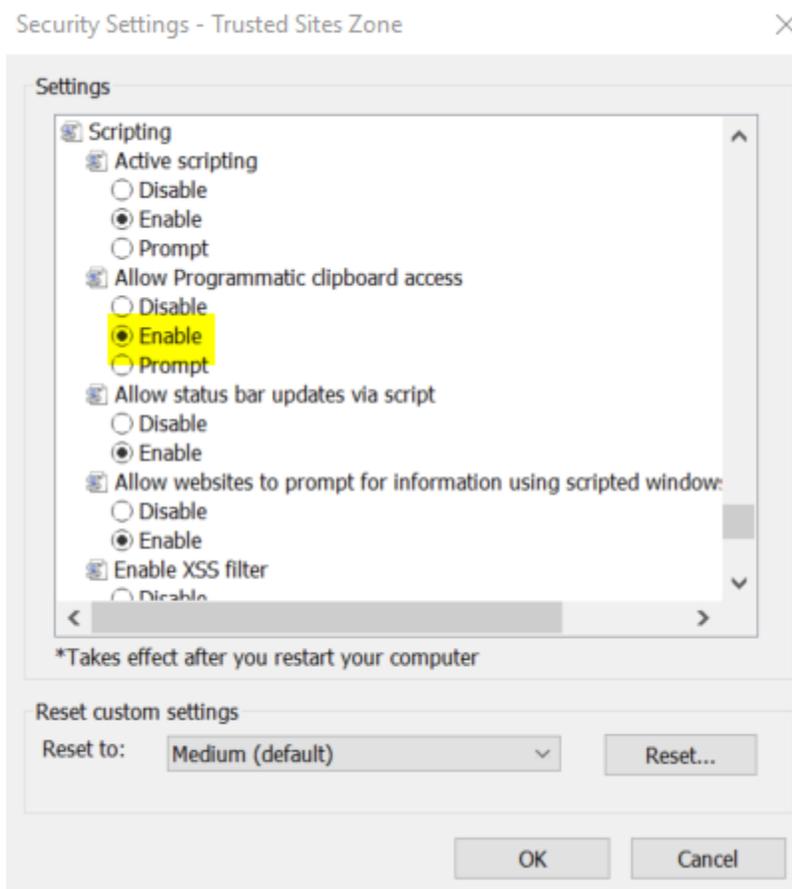

While the Trusted sites zone is selected > click on Custom level... > Under the Miscellaneous group, enable the following settings > 'Allow script-initiated windows without size or position constraints' > 'Allow websites to open windows without address or status bars'

Beaumont

Also click the radio button that says 'Allow programmatic clipboard access'

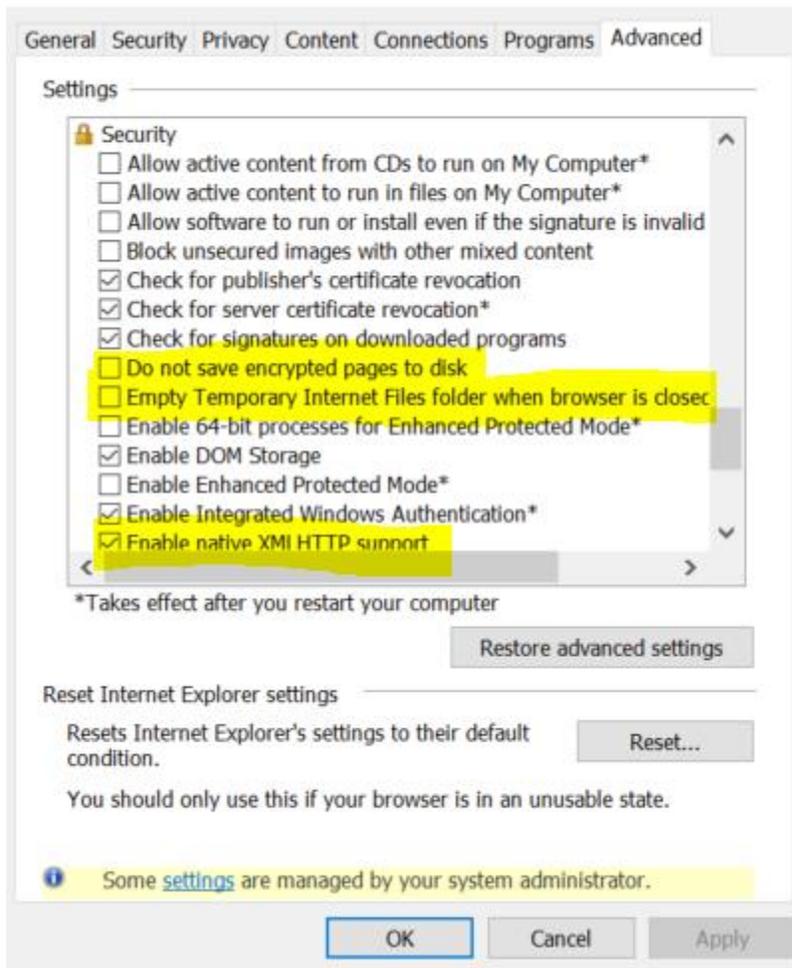

Internet Options > Advanced tab > ensure that the following checkboxes are NOT checked > 'Do not save encrypted pages to disk' 'Empty Temporary Internet Files folder when browser is closed'

Beaumont
