

### SARS-CoV-2 & Influenza A/B by NAA, Routine

Effective Date: December 14th, 2021

With influenza cases on the rise, Beaumont Laboratory will offer a new combo test that detects SARS-CoV-2, influenza A and influenza B. The new combo test is an automated multiplex real-time RT-PCR assay that is run on the Roche cobas® 6800 system. Ordering the new combo test will provide a quicker turnaround time than individual test orders for influenza (Influenza AB, NAA [LAB7165]). Providers are encouraged to order the new combo test when both viruses are circulating to differentiate COVID-19 from influenza due to difference in patient treatment and management.

#### Test Information:

Name: SARS-CoV-2 & Influenza A/B by NAA, Routine  
Order Codes: LAB8541  
CPT Code(s): 87636  
Specimen: Nasopharyngeal (NP) Swab  
Schedule: Results available within 24-48 hours  
Summary: Multiplex nucleic acid amplification test that detects SARS-CoV-2 and Influenza A/B.
